Ethics Application No: 300170037

Dear Dr. Scheepers,

This is to let you know that your submission “How do familiarity and emoticon use influence irony processing following rapid serial visual presentation: an investigation of accuracy” has been approved by the Ethics Committee of the College of Science and Engineering.

Sincerely yours,

Marios Philiastides

Reviewer comments:

R1:

I have reviewed the application form, consent form, participant information, and support document for 300170037 and can confirm that I see no ethical issues which might be considered a problem. The research is consistent with BPS guidelines.
